CERTIFIED ORGANIC SPF50+ SPORT SUNSCREEN STICK

*

Product Description

The SPF50+ SPORT SUNSCREEN STICK guarantees optimal cellular protection in extreme conditions thanks to its broad spectrum UVA/UVB mineral screens and patented red seaweed extract, Alga-Gorria®, a powerful antioxidant that neutralizes free radicals to prevent cell damage and skin aging caused by solar radiation.

The nose, ears, and cheekbones are all parts of the face that are both hard to protect and particularly sensitive to the sun.

Purposely designed to leave a colored mark where applied, the SPORT SPF50+ Sunscreen Stick makes it possible to see the areas that are protected and ensure that they stay protected. Highly water-, and thus sweat-resistant, the SPORT SPF50+ Sunscreen Stick will not get in the eyes during intense sporting activities. It is a must-have tool for surfers! The SPORT SPF50+ Sunscreen Stick is also suitable for use on recently healed over scars, which must be absolutely protected from UVs.
